

Special Issue

Advanced Machining Strategies for Conventional and Additively Manufactured Components

Message from the Guest Editors

This Special Issue aims to provide a comprehensive and up-to-date forum for high-quality research addressing both conventional machining and the machining of additively manufactured components, with emphasis on scientific understanding, process optimisation, and industrial applicability. By bringing together these domains, the Special Issue seeks to highlight the evolving role of machining within hybrid and integrated manufacturing systems, where subtractive and additive processes coexist and complement each other. The scope is intentionally broad but technically focused, encouraging contributions that advance machining science while addressing the specific challenges posed by emerging materials and manufacturing strategies.

Guest Editors

Dr. Francisco J. G. Silva

Prof. Dr. Wengfeng Ding

Dr. Mykhaylo Frolov

Dr. Angelos P. Markopoulos

Deadline for manuscript submissions

31 March 2027

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE–Electromechatronic Systems Research Centre, University of
Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1
(Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
